# Easy & Tablette

Manual sheeters

## SHEETS PERFECTLY DONE

The EASY and TABLETTE dough sheeters have been specifically designed for small laboratories that need an easy, reliable, economic and quality product. The small overall dimensions and the possibility of always folding the machine at the end of each day of use allow you to increase flexibility in your laboratories without compromising on quality and precision in processing. Furthermore, with the new display, reading the cylinder opening quota will be simple and immediate even for the less experienced.

With TABLETTE, the ultra-compact dimensions allow the use also in the kitchens of restaurants and hotels, where this machine fits perfectly, managing to sheet the dough with professional quality and keeping the maximum overall dimensions under the meter.

## Tablette

Ultra compact

Our "pocket" dough sheeter for small productions, ideal for restaurant and hotel kitchens that do not want to give up quality with little space.

Technical data	U.M.	Tablette
Useful lamination space	mm	500
Flour tray capacity	Kg	3
Working dimensions AxBxC	mm	930x973x428
Support base dimension DxE	mm	290x653
Dimensions at rest	mm	362x973x428H
Packaging dimensions	cm	115x80x100H
Net weight machine	Kg	87
Weight machine + packaging	Kg	105
Rated electrical power	kW	0,37
Supply Voltage	V	220 - 380
Frequency	Hz	50 - 60
Electrical phases		1/3

**Ideal for sheeting even reduced thicknesses of dough**

### BENCH MODEL

The bench model of the EASY range maintains all the qualities of the machine with base combined with a smaller footprint.

### CUTTING DEVICE

**Optional:** Dispositivo di taglio a rulli disponibile per i modelli con lunghezza nastro di 1400mm e 1600mm.
